Client sample ID	Zoologix accession ID	Sample type	Assay	Assay result
28 lb Sweet Potato & Chicken Dry 17/Jun/11 NBJ1202D2NLGA 01:14	1006160002	Pet food	B0040	Negative
5 lb Sweet Potato & Chicken Dry 17/Jun/11 NBJ1202LDAR 02:20	1006160003	Pet food	B0040	Negative

Notes

Assay B0040: Ultrasensitive qualitative detection of *Salmonella* by real time PCR\*

**\*Note from Natural Balance: This is the description of the type of test performed.**

*Zoologix has verified the performance characteristics of these tests. However, diagnosis and management of the animal patient should not rely solely upon the results of these tests, as unusual genetic variations of the pathogen can affect results. Correlation with other clinical data is recommended. Specimens will be held for six months by Zoologix to facilitate followup testing, after which time specimens will be disposed of at the discretion of Zoologix unless otherwise directed by client.*
