

# How to Transition to any new Natural Balance formula

DICK VAN PATTEN'S  
**Natural Balance**  
PET FOODS, INC.®

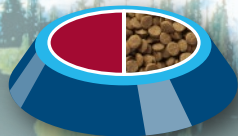

For best results, transition over a 5-7 day period to allow your pet to adjust to this new formula.

 Current  
Pet Formula

 Any Natural Balance  
Formula

Day 1-2

Day 3-4

Day 5-6

Day 7

When switching your pet's diet, we recommend transitioning from the current diet to any new Natural Balance Formula over a 5-7 day period.

Replace 25% of the current diet with new Natural Balance Formula each day until they are fully transitioned. If you do not have any of your current formula to mix, reduce the amount of formula fed for the first few days, feeding smaller more frequent meals and increase over time.

\*If your pet is more sensitive to change, please allow 10-14 days to fully transition onto the new formula.

#### BUY WITH CONFIDENCE® PROMISE

The Natural Balance® Buy With Confidence® promise comes from decades of experience crafting premium pet food from the best ingredients. Because we believe every bowl of food should be fast, nutritious and safe. Your satisfaction is 100% guaranteed! [www.BuywithConfidence.com](http://www.BuywithConfidence.com)
